

EISENHOWER LIBRARY

STAT

[redacted] (1/29/82) says Eisenhower Library has just relayed the following concerning its holdings:

CIA serially numbered reports - about 1000 documents. They are preparing a list which they will forward to us in about 1 month.

Other CIA originated material - about 1000 pages of memos, cables, etc. These are already segregated and waiting for us to review.

In addition, there are "sizeable" but as yet undefined holdings of White House originated material, WHH documents, and Psychological Strategy Board files.

Operations Coordinating Board material - 59 cubic feet (about 120,000 pages), which he says we will have to go through page by page. (Truman Library, he says, has about 20 cubic feet of this material also.)

Another assistance the Library wants is advice on composing ~~wik~~ their finding aids so as to avoid including classified material.
